

Automotive Drive Train Lubricant Application

- Mixing unidentified lubricants is an unwise practice. For best results, it is always advisable to completely drain any lubricant from a reservoir and use fresh lubricant of the recommended type.
- Never expect any A.P.I. GL-5 rated gear oil to be of accepted quality for use in "Posi-Trac" or "Limited-Slip" differentials without a friction modifier package. For superior performance and protection, add BG MGC® Multi-Gear Concentrate, PN 325, or BG LS II Concentrate, PN 328, to BG Ultra-Guard Gear Lube.
- BG Ultra-Guard Heavy Duty, PN 752, is a synthetic gear oil and should be changed at the automobile manufacturer's recommended interval. BG Syncro Shift® II, PN 792, and BG Ultra-Guard, PN 750, are synthetic, "lifetime" lubricants for gear drive train applications.

Legend

MT - Manual Transmission
MTA - Manual Transaxle
DIFF - Differential
FD - Final Drive
TC - Transfer Case

FWD - Front Wheel Drive
RWD - Rear Wheel Drive
750 - BG Ultra-Guard Synthetic Gear Lube (SAE 75W-90)
752 - BG Ultra-Guard Heavy Duty (SAE 75W-140)
792 - BG Syncro Shift® II Gear Oil (SAE 5W-30)
and (SAE 75W-80)
